LYSAGHT

Manufactured from **Colorbond**®

Stylised Gates Made to order

Think strength... think COLORBOND® steel

Leading scientists have been testing COLORBOND® steel for over 50 years in some of our country's harshest climate conditions. So you have the peace of mind of knowing COLORBOND® steel is made and tested for Australia and backed by a warranty* from BlueScope Steel, one of Australia's largest companies.

If it's not BRANDED it's not

Colorbond®

Not all coloured steel fencing is made from COLORBOND® steel. Be sure to get what you pay for. Fencing made from COLORBOND® steel is branded with a subtle laser engraving (on either side of the fence) at least three times on each 2.4 metre fencing section.

If you can't find the branding then the panels are not genuine COLORBOND® steel.

Why is COLORBOND® steel so tough?

Tested in the harshest Australian conditions over the last 50 years, your COLORBOND® steel fence is far more than just 'paint on steel'.

Step 1. The structural steel core base is made to meet Australian Standard AS 1397, ensuring strict adherence to the highest quality grade and finish of your steel.

Step 2. The steel base of the fencing panels is coated with Activate™ technology, BlueScope's industry-leading metallic coating that enhances anti-corrosion performance.

Step 3. A thin pre-treatment layer is applied to enhance the adhesion of further coatings.

Step 4. A polyester primer is baked onto the surface.

Step 5. A topcoat of specially developed exterior grade lead-free paint (compliant with Australian Standard AS 2728) is baked on for enhanced resistance to chipping, peeling and cracking and to ensure the finish retains its look for longer.
