## Cyclone® Security Chainwire Fence Solutions

Cyclone® Security Chainwire Fencing is the ideal material for providing an efficient and economical fencing solution around the widest possible range of sites and properties.

Whether your requirements depend upon cost, appearance, security levels, or the individual demands of the site, you can be sure that Ammag Group's wide and innovative range will provide a finished chainwire security fence to suit your specific needs.

### Ideal for:

- Factory enclosures • Building site enclosures
- Tennis court fencing • Internal factory partitions
- Cricket practice nets • Temporary protective fencing
- Softball/baseball nets

### Why Choose Cyclone® Security?

- Provides constant security against trespassers, pilferers and animals
- Long Term Durability – stands up to rugged conditions and requires minimal maintenance
- Easily extended – additional fencing can be easily matched with the original for future extensions
- Readily relocated – chainwire fences have a high recovery rate, and can be relocated as the extension of premises demands
- Highly flexible – can be easily fitted around building columns, roof trusses, air conditioning ducts and hot water services.
- Galvanised & LifeMax™ wire – ensures long life and low maintenance.
- PVC coating – chainwire is available in black or green to blend with the environment
